

# Emissions Management / Carbon Accounting Solutions

## Climate risk is financial risk.

New SEC requirements will make emissions reporting mandatory and subject to the same rigor and assurance as financial disclosures. Having an auditable emissions management solution will reduce risks, facilitate reporting, and provide decarbonization insights to help reach your goals.

# 99%

Surveyed executives of public entities *somewhat* or *very likely* to invest in more sustainability technologies and tools over the next 12 months.<sup>1</sup>

# 37%

Executives prepared to disclose Scope 3 emissions today with various data concerns listed as their top blockers.<sup>1</sup>

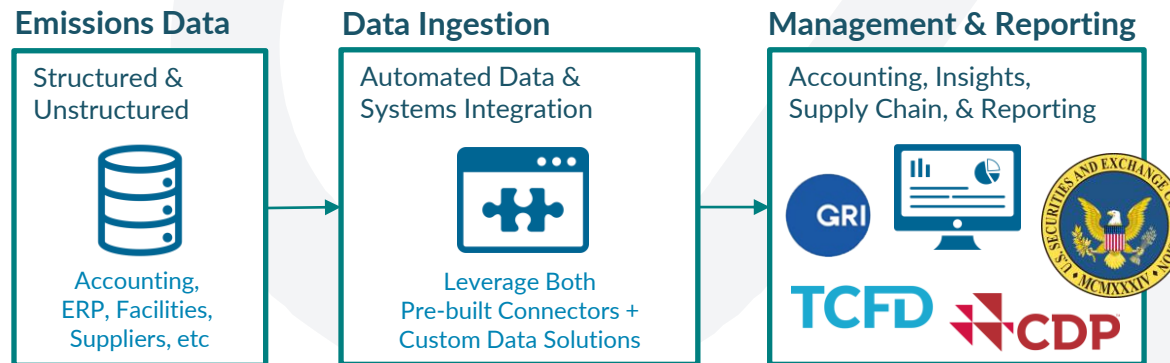

## Gain automated emissions data flows into top carbon accounting solutions.

Our Emissions Management solutions provide tangible outcomes and key business benefits through our expert-guided implementation & integration program to overcome common carbon accounting challenges:

- Identifying, acquiring, and ingesting emissions data
- Data quality, consistency, and cleansing issues
- Automated data flows for timely, accurate, and auditable data
- Sustainability and technical skills gaps and solution learning curves

Stratascale partners with top carbon accounting providers to provide end-to-end solution guidance in cooperation with these partners so that our clients receive both climate guidance alongside white-glove solution implementation and integration.

### STRATASCALE'S IMPLEMENTATION + INTEGRATION GUIDANCE
